Foreword

The economic recession that hit full force in 2008 was declared officially over in June 2009 when the country experienced two quarters of very slow growth. But a troubled housing sector and a still-sluggish economy with high unemployment have contributed to the fiscal crises facing many cities and counties in North Carolina. As always, this edition of *By the Numbers* (BTN) is must reading for government officials and taxpayers alike. It highlights what kinds of fiscal problems face local governments in an economy that grows only very slowly.

With the facts given here, county commissioners and city council members can easily compare their area's tax burden to similarly situated cities or counties. For taxpayers, BTN is a starting point for questions about taxes and spending, enabling them to hold their elected and appointed officials accountable. This year, as in previous years, policy analyst Michael Lowrey continues the meticulous data collection and reporting that make BTN an essential touchstone for discussions of city and county finances in North Carolina.

As always, readers should consider the numbers presented here in context. Cities and counties differ in many ways, making cross-comparisons tricky. For example, not all cities provide solid waste service, recreation facilities, or convention centers. In addition, property tax revenue bases differ. Some coastal and mountain cities and counties have large numbers of part-time residents with seasonal homes; they are not counted in the population figures, but they still pay property taxes. The differences matter, so we recommend that readers make comparisons with cities and counties with similar demographics.

There is no doubt that the recession has reduced local revenues. Its impact continues to be reflected in the period covered in this report, Fiscal Year 2012. The median county revenue per capita was up slightly from an inflation-adjusted \$1,267 to \$1,277 per capita. That figure represents a significant burden for a family of four of \$5,107, especially given the high levels of state and federal taxation and still-elevated unemployment levels.

The John Locke Foundation urges local government officials and taxpayers to continue to ask key questions: What is the proper role of local government? What are essential services, and what are unnecessary frills? North Carolina's families must face those kinds of questions every day in determining what are the essential expenses and unnecessary frills for their own households. Most people would probably agree that local government's core services are fire, police, and sanitation. But would they agree that core services also include taxpayers' subsidies to golf courses, convention centers, whitewater parks, and even restaurants? Especially in times of economic recession, these questions become even more important. While BTN does not answer these questions, it provides a baseline for discussing them. We at the John Locke Foundation believe that a lively public debate is healthy, and we are glad to provide this report to help foster and inform that debate.

The John Locke Foundation Research Division

Executive Summary

Counties and towns are critical levels of government in North Carolina, providing or administering many services while taking in billions of dollars of revenue. This is especially true as the state government has increasingly shifted more taxing authority to localities to make up for money kept by the state. While the importance of county and municipal government is great, obtaining comparative data is difficult. To help address this problem, *By The Numbers* provides information on how much local government costs in every city and county in North Carolina.

Methodology

Using the most recent data available on property taxes, sales taxes, and miscellaneous taxes and fees from the State Treasurer's Annual Financial Information Report (AFIR), this report calculated county and municipal tax and fee burdens in two ways: 1) as a percentage of income (for counties), and 2) per capita (for counties and municipalities). We then constructed a set of rankings to view the cost of local government more clearly.

Although this analysis is by no means definitive, it gives citizens more useful information for grappling with this complicated issue.

Findings

North Carolina collected \$21.9 billion in state tax and fee revenues for Fiscal Year 2012 (from July 1, 2011 to June 30, 2012), the latest year for which data are available. This represented 6.0 percent of the personal income of the state's citizens. In addition, local governments collected an additional \$15.7 billion in property, sales, and other taxes and fees, representing another 4.3 percent of personal income. Combined, they represent a state and local tax and fee burden of 10.3 percent. Federal collections raise the total tax burden on North Carolinians to approximately 26.8 percent of personal income, on average.

Nominal (non-inflation adjusted) local government revenues increased by some \$400 million in

FY 2012 as compared with the previous year. This is not to say that all revenue sources increased. Sales tax revenues increased were up by about \$150 million – a 7.5 percent increase – while property tax revenues increased by about \$250 million, or 3 percent. Water department revenues and other tax and fee income were essentially flat.

The larger increase in percentage terms of sales-tax revenues is significant. Sales tax receipts fell sharply during the Great Recession, leaving local governments more dependent upon property tax receipts. FY 2012 sales tax collections, though improved, were still \$600 million below the level of four years earlier.

Local tax and fee collections per-capita stood at \$1,276.80 in the median county in FY 2012, compared with an inflation-adjusted \$1,267.36 the year previous. That amounts to 3.94 percent of per-capita personal income in the median county, down from 2011 when it was 4.24 percent of per-capita personal income.

It is important to note that incomes vary among counties and within counties over time, and this can affect the rankings. Counties of similar size and tax collections can vary in their burdens because of differences in per-capita incomes. Differences among counties can also reflect the extent to which residents live in towns and cities, which places more taxpayers onto municipal tax rolls.

The State Treasurer's office drastically reformulated how local government financial information is reported with the FY 2012 data. It is thus possible that the line items covered in the latest report may not exactly match those included in previous editions.

Furthermore, data in this report are subject to other reporting issues, which include revisions of per-capita personal income estimates and localities filing their required AFIR reports in an untimely manner. For that reason, the figures for previous years in this edition of *By The Numbers* may not exactly match those reported in previous editions. As such, the current edition's figures take precedence.

Introduction: *Local Fiscal Policy Is a Statewide Issue*

The finances of North Carolina's counties and municipalities remain a critical public-policy issue. The state's persistent budgetary difficulties continue to place a heavy burden on local governments and, by extension, local taxpayers. At the same time, the still sluggish economy has impacted the revenues localities receive from sales taxes and secondary revenue sources. While local governments did obtain more revenue from property taxes in FY 2012 than they had previously, continuing real estate market corrections are likely to limit the ability of many localities to obtain additional revenue from this source.

Calculating burdens

Local governments in North Carolina are required to file audited financial statements with the Department of State Treasurer each year. *By The Numbers* (BTN) builds upon this information, which is available online at <https://www.nctreasurer.com/slgl/Pages/County-and-Municipal-Financial-Data.aspx>

BTN examines property taxes, sales taxes, and total local government collections of all taxes and fees for counties and municipalities for FY 2012, the latest year for which data are available. For each of the three categories, a revenue-per-capita figure was computed. Countywide figures were also calculated as a percentage of per-capita personal income. The specific line-items used for each category are listed in Appendix D (page 43).

The amount that the average citizen in each North Carolina county pays for local government, county and municipal, is presented as a dollar amount and a percentage of income on pages 6 through 10.

Appendix A (pages 11-31) focuses on counties by themselves, including data on property taxes, sales taxes, and total county collections, both per capita and as a percentage of per-capita personal income. Counties are also ranked against each other. Summary data (page 28) and a list of municipalities in each county can also be found in Appendix A.

Appendix B (page 32-41) presents combined municipal and county tax burdens. Municipalities are

sorted by population and ranked in four population ranges (under 1,000; 1,000–4,999; 5,000–24,999; and 25,000 and over). Appendix B also gives data on property, sales, and total local tax and fee collections.

Appendix C (page 42) indicates whether municipalities with populations of 5,000 and above operate water and sewer systems or operate electrical systems or sell natural gas.

Readers will immediately notice the relatively high per-capita property taxes in many resort communities in North Carolina. Given the nature of the data, that is not surprising. Second homes and resorts certainly do appear on local tax registers. Because owners or renters only rarely live in these dwellings year-round, however, such localities typically have small permanent populations. High tax values divided by a small permanent population will produce a high per-capita tax burden. Therefore, these numbers are not necessarily comparable to other tax-burden statistics.

A common comment about BTN is that it necessarily categorizes communities with higher sales-tax revenues as being high-tax communities. While sales-tax revenues are (largely) what they are, localities retain the discretion to determine their overall revenues by altering their property-tax rates and the other taxes and fees they collect. Thus higher sales-tax revenues allow a community to lower its property-tax rates, lower its fee structure, provide more services, or some combination of all three.

While BTN shows the cost of local government, it does not attempt to measure the quantity or quality of services provided in exchange for those dollars. Nor does the report consider the additional out-of-pocket costs to individuals for services that their local government may not provide. In unincorporated areas, for example, homeowners may have to contract privately for garbage pickup, while those living in a town or city may well receive this service, paid for through their municipal property and other taxes. Municipalities may also use some of their tax dollars to provide a higher quality of fire protection, which may translate into lower homeowners insurance rates.

Importantly, this means that whether a jurisdiction is ranked high or low in cost of government is not the end of the debate over fiscal policy — it is merely the beginning. Citizens of North Carolina's cities and counties must decide whether the services they receive are worth the price they and their fellow taxpayers (residential and business) are paying in local taxes and fees.

For comparison, we have included a full set of results for counties and rankings for municipalities for FY 2012. To make fair comparisons, figures for earlier fiscal years have been adjusted for inflation. Readers may obtain actual collections in FY 2011 by multiplying the listing by .9861. For FY 2010 partial results are included; the corresponding multiplier to adjust for inflation is .9516.

Local tax burden down

Based upon data available in May 2014, the typical resident of the median county in North Carolina paid \$1,277 in taxes and fees to county and municipal governments during FY 2012. This accounted for 3.94 percent of personal income. Collections in FY 2011 were an inflation-adjusted \$1,267 per capita.

The average North Carolinian actually pays more, though, than the typical resident of the median county. Many of the state's more populous counties also have above-average local tax and fee burdens; when that dynamic is factored in, a state average would amount to 4.28 percent of personal income.

Unfortunately, two counties — Hyde and Sampson — and 44 municipalities did not file their AFIR reports in a timely manner and thus are not included. Complete reporting would result in a somewhat higher combined city/county median tax burden.

Combined city/county taxes

Dare County residents paid the highest amount in taxes and fees to local government (\$4,388 per capita). The counties of Currituck (\$2,632), Mecklenburg (\$2,580), Durham (\$2,318), and Orange (\$2,245) also ranked in the top five in revenue collected per capita.

Residents in the counties of Caswell (\$793), Gates (\$800), Stokes (\$827), Scotland (\$845), and Alexander (\$846) paid the lowest average amounts in taxes and fees to local governments.

Looking at the local tax burden as a percentage of personal income yielded somewhat different results. Dare County again lead the way with county and municipal revenue accounting for 10.65 percent of per-capita personal income. Second through fifth were the counties of Currituck (6.23 percent of per-capita personal income), Brunswick (5.83 percent), Durham (5.66 percent), and Mecklenburg (5.44 percent).

Local Tax Burden by Fiscal Year

FISCAL YEAR	MEDIAN COUNTY	AVERAGE COUNTY	STATEWIDE AVERAGE
2010	4.16%	4.27%	4.44%
2011	4.11%	4.17%	4.32%
2012	3.94%	4.00%	4.28%

By comparison, taxes and fees collected by local governments accounted for 2.37 percent of per-capita personal income in Onslow and Caswell counties. In a majority of counties, total collections were at four percent of per-capita personal income or less.

Among the 36 cities with populations over 25,000, Charlotte had the highest combined city/county tax and fee collections per capita. Mooresville, Chapel Hill, Wilmington, and Monroe were also in the top five. The lowest per-capita collections were in Jacksonville, followed by Thomasville, Indian Trail, Fayetteville, and Asheboro.

Notes:

- a) Municipality has at least 1,000 residents in two counties; is listed under county in which the greater number of residents live.
- b) Results could not be calculated in part; municipality had not submitted FY 2012 AFIR by May 15, 2014.
- c) Results could not be calculated; municipality did not submit FY 2012 and FY 2011 AFIRs by May 15, 2014.
- d) Results could not be calculated; though municipality submitted its AFIRs in a timely manner, the county in which it is located did not.
- e) Results for FY 2012 could not be calculated; municipality had not submitted FY 2011 AFIR by May 15, 2013.
- f) Municipality only incorporated in FY 2012.

Utilities Provided by Municipalities with Population of 5,000+

	10770	All other revenues not tax, intergovernmental, utilities, or sales and service

* Excluded from municipality- and county-only analyses.

About the Author

Michael Lowrey is an economist and a former instructor at the University of North Carolina at Charlotte and Wingate University. A policy analyst in the fields of economics and regulatory policy for the John Locke Foundation as well as associate editor of *Carolina Journal*, Lowrey has written numerous articles over the years on such topics as economic policy, education, welfare, and transportation, and has appeared in over 100 newspapers such as *The Christian Science Monitor*, *The Charlotte Observer*, *The News & Observer* of Raleigh, and *The News & Record* of Greensboro. He received his undergraduate degree from the University of North Carolina at Chapel Hill and his masters in economics from North Carolina State University.

About the John Locke Foundation

The John Locke Foundation is a nonprofit, nonpartisan policy institute based in Raleigh. It seeks to transform state and local government through the principles of competition, innovation, personal freedom, and personal responsibility in order to strike a better balance between the public sector and private institutions of family, faith, community, and enterprise.

To pursue these goals, JLF operates a number of programs and services to provide information and analysis to policymakers, civic and community leaders, activists, and the news media. These services and programs include research reports on policy issues such as taxes, education, health care, regulation, and economic development; a media outlet, *Carolina Journal*, with an audience of 200,000 North Carolinians receiving print, radio, video, or online editions at *CarolinaJournal.com*; a quarterly member newsletter, *The Locke Letter*, and a variety of blogs, web sites, and media outreach efforts; and regular luncheons, policy briefings, panel discussions, and other events held throughout the year in Raleigh, Charlotte, the Triad, Asheville, Wilmington, and other North Carolina communities.

The John Locke Foundation is a 501(c)(3) tax-exempt public charity and is funded solely from voluntary contributions from individuals, corporations, and charitable foundations. It was founded in 1990. For more information, visit www.JohnLocke.org.
